

Dear Parent:

12/1/2018

MIHS uses Renaissance Star Reading and Star Math Testing to help us, help students.

Students are tested at the beginning of each semester in literacy and math to provide a benchmark which is then used to place students into a math or literacy group for 30 minutes of focused instruction during flex period.

Parents have access to the results of these tests. The Parent Report, which is available in English or Spanish, presents a student's test results from the most recent testing session for the student's parents or guardians. Web site :

https://help.renaissance.com/SR/Parent_Report

Parents can also be given access to Renaissance Place, allowing them to print this report from home.

Each student's report is printed on a separate page and shows the students name, grade, teacher, class, and ID. The report includes a detailed comparison to scores on the national level; it shows the Grade Equivalent (GE), Percentile Rank (PR), Percentile Rank range, Instructional Reading Level (IRL), and Zone of Proximal Development (ZPD). Depending on the setting of the Lexile® Measures Preference, the Lexile® Range may also be shown. The parent report is generated in an easy-to-read letter format with sections for a teacher's signature and additional comments about the student's performance.

1. Click **Star Reading** on the Home page, then click **Reports** to begin printing the report. If looking at Math: Click **Star Math** and follow the same directions.
 2. Select your school from the **School** drop-down list, if necessary.
 3. Click either **Parent - English** or **Parent - Spanish** on the Select Report page.
1. Select the options you want to customize for this report on the Report Options page. When you customize this report, you can choose these options:

Select Students

Reporting Parameter Group

Reporting Period

Show Grade Equivalent

Group By

Choose how to group the information on the report: by class, grade, teacher, or not grouped.

Note: This report uses both the Group By and Sort By options; if a Group By option is chosen, it is applied first on the report.

Sort By

2. Click **View Report** when you are finished choosing options.
3. Star Reading will generate the report. When it's ready, the report will open in Adobe Reader, or your default PDF reader.
